Subject: microsoft settlement

for what it is worth, if microsoft is to donate anything to the school systems in the U S that have technology needs, I would suggest a monetary fund be set up, administered by someone outside the system, similar to a trust fund, without exorbitant associated administrative costs, and this fund be used to acquire hardware and software as necessary for any particular school, DETERMINED ONLY by the school and it's teaching faculty, not microsoft.

respectfully,

Nick Baily
